

Geneia is providing employers with the kind of robust data and analytics that have previously only been available to physicians, hospitals, and health plans.

Employer Solutions.

Geneia's advanced employer solutions enable plan oversight, competitive peer comparison, and course correction on overspending.

Advanced Insights.

Our advanced healthcare analytics and insights give you the information needed to measure and manage healthcare cost, utilization, and quality for your employees.

**Healthy Benefits.
Healthy Workforce.**

Improve **employee health.** Strengthen **your bottom line.**

- Make informed decisions regarding value-based benefit plan designs with the ability to measure financial and behavioral results
- Analyze and compare episode-based cost and utilization information
- Gain insight on referral patterns, areas for efficiencies across networks and providers, and utilization trends with a focus on admissions, post-discharge visits, and readmissions
- Clearly see unwarranted variation, identify care best treated in an ambulatory setting, and design programs to achieve desired outcomes
